***Medication Permission Slip***

To all Parents/Guardians:

If possible, parents/guardians are advised to give medication at home and on a schedule other than during school hours. If it is necessary that a medication be given during school hours, the following regulations must be followed:

1. **All** medication must be ordered by physician/dentist and permission granted to the school by the parent to give the medication.
2. **All** medication must be brought to school by parent/guardian in original container with appropriate label intact. The parent/guardian can hand a properly labeled container to the bus driver who will then deliver it to the school office.
3. **Medication** can not be put in child's lunch container or taken to the classroom
4. **If medication is not properly labeled, it will not be given.**
5. Parent/guardian must sign this form granting the designated school personnel permission to administer medication, according to regulations set herein.

Name of Student: \_\_\_\_\_ Birth Date: \_\_\_\_\_

The above named student is currently under my care and is receiving medication(s) for the following condition(s):

Medication(s) to be administer at school during schools hours:

Drug: _____	Amt: _____

**Medication Permission Form**

The physical well being of children is a major concern of both parents and educators. We realize there may be medical reasons, which require medication to be given at school. We will be glad to assist in giving medication at school providing State and District regulations are met. We are concerned with the safety of all students and would like to remind you of the regulations that help us to maintain a safer environment.

If your child forgets his/her morning dose of medication at home it cannot be given at school unless the doctor has signed a permission slip in advance. The parent will need to come to the school and administer the missed medication.

All medication must be picked up after the Doctor's order expires. Any unclaimed medication will be discarded. If a student moves or discontinues medication, the medication will be discarded one month from the day the student leaves.

Personnel of the school district shall not be held liable for the reasonable treatment of a child through the authorized dispensing of medication as prescribed within this Regulation.

Over-the-counter medication still requires completion of the District Medication Authorization Form and must also be in properly labeled original containers. All medications must be brought to the school by the parent/guardian. Medications may not be sent with students on the bus. For your child's protection and the protection of other children, the medicine will be kept locked in the school health office and will be administered there.

**Continuing Medication Regimen for Non Episodic Condition:** The parent or legal guardian of any public school student on a continuing medication regimen for long term administration of medicine SHALL INFORM THE SCHOOL IN WRITING of the medicine, the current dosage, and the name of the supervising physician. The school nurse or other designated employees of the school may communicate with the physician and counsel with school personnel regarding the possible effects of the medication on the child's intellectual, physical, and social behavior such as signs and symptoms of adverse side effects, or consequences of omission or overdose (Education Code Section 49480).

**Disaster Medications:** If your child takes a daily medication for a life threatening condition, he/she should have enough medication at school (3-7 days advised), in case of a disaster, to sustain him/her for a short time.
